

Call for Papers RAID 2007

Recent Advances in Intrusion Detection 2007 10th International Symposium

September 5-7, 2007

Crowne Plaza Hotel, Gold Coast, Queensland, Australia

Hosted by: Information Security Institute, Queensland University of Technology, Brisbane, Australia

<http://www.isi.qut.edu.au/go/raid07>

This symposium, the 10th in an annual series, brings together leading researchers and practitioners from academia, government, and industry to discuss issues and technologies related to intrusion detection and defense. The Recent Advances in Intrusion Detection (RAID) International Symposium series is intended to further advances in intrusion defense by promoting the exchange of ideas in a broad range of topics. As in previous years, all topics related to intrusion detection, prevention and defense systems and technologies are within scope, including but not limited to the following:

- Intrusion detection and prevention techniques
- High-performance intrusion detection
- Intrusion detection in special environments (e.g., mobile networks)
- IDS cooperation and event correlation
- Formal models and analysis
- Attack response, countermeasures, and intrusion tolerance
- Survivability and self-protection
- Attacks against IDS and evasion
- Insider threat detection and mitigation
- Deception systems and honeypots
- Malicious code detection and containment
- Visualization techniques
- Intrusion detection assessment and benchmarking
- IDS interoperability standards and standardization
- Vulnerability analysis and risk assessment
- Legal and social issues

Important dates

Deadline for paper submission:

March 31st, 2007

Deadline for panel submission:

May 5th, 2007

Notification of acceptance or rejection:

June 1st, 2007

Final paper camera ready

copy: June 16th, 2007

Deadline for poster abstract

submission: July 7th, 2007

Notification for poster

acceptance: July 23rd, 2007

RAID 2007 invites four types of submissions:

- **Full papers** presenting mature research results: Papers accepted for presentation will be included in the RAID 2007 proceedings published by Springer Verlag in its Lecture Notes in Computer Science (<http://www.springer.de/comp/lncs/index.html>) series. Papers are limited to 20 pages when formatted according to the Springer Verlag instructions (<http://www.springer.de/comp/lncs/authors.html>), and must include an abstract and a list of keywords.
- **Short papers** presenting original work that has not yet reached the maturity required for a full paper. These are limited to 10 pages using the same format required for full papers. Short papers can describe new research results or practical experience that demonstrates the limitations and capabilities of existing approaches to intrusion detection and network security. They will be reviewed by the program committee, and accepted papers will be included in the proceedings (in short form - not expanded to full papers - and with "Short paper" in the title) and presented orally during the symposium (in shorter speaking slots).
- **Panel proposals** for presenting and discussing hot topics in the field of intrusion detection systems: The panel proposals should include both an outline

of the format of the panel and a short rationale for the panel. Panels that include time for general discussion and questions-answers between the panelists and the audience are preferred.

- **Poster proposals** describing work in progress: submissions must consist of a one-page abstract.

All submissions (papers, short papers, and panel and poster proposals) must be submitted electronically. Papers should list all authors and their affiliations; in case of multiple authors, the contact author must be indicated (RAID does not require anonymized submissions). For accepted papers, it is required that at least one of the authors attends the conference to present the paper. Further questions on the submission process may be sent to the program chair.

Submissions must not substantially duplicate work that any of the authors has published elsewhere or has submitted in parallel to a journal or to any other conference or workshop with proceedings. Simultaneous submission of the same work to multiple venues, submission of previously published work, and plagiarism constitute dishonesty or fraud. RAID, like other scientific and technical conferences and journals, prohibits these practices and may, on the recommendation of the program chair, take action against authors who have committed them.

Organizing Committee

General Chair: George Mohay (Queensland University of Technology, Australia; g.mohay@qut.edu.au)

Program Chair: Christopher Kruegel (Technical University Vienna, Austria; chris@seclab.tuwien.ac.at)

Publication Chair: Andrew Clark (Queensland University of Technology, Australia; a.clark@qut.edu.au)

Publicity Chair: Rei Safavi-Naini (University of Wollongong, Australia; rei@uow.edu.au)

Sponsorship Chair: Ming-Yuh Huang (The Boeing Company, USA; ming-yuh.huang@boeing.com)

Steering Committee

Chair: Marc Dacier (Eurecom, France)

Hervé Debar (France Telecom R&D, France)

Deborah Frincke (Pacific Northwest National Lab, USA)

Ming-Yuh Huang (The Boeing Company, USA)

Erland Jonsson (Chalmers, Sweden)

Wenke Lee (Georgia Institute of Technology, USA)

Ludovic Mé (Supélec, France)

Alfonso Valdes (SRI International, USA)

Giovanni Vigna (UCSB, USA)

Andreas Wespi (IBM Research, Switzerland)

S. Felix Wu (UC Davis, USA)

Diego Zamboni (IBM Research, Switzerland)

Program Committee

Michael Behringer, Cisco Systems Inc., France

Sungdeok Cha, Korea Advanced Institute of Science and Technology, Korea

Andrew Clark, Queensland University of Technology, Australia

Marc Dacier, Eurecom, France

Herve Debar, France Telecom R&D, France

Ulrich Flegel, University of Dortmund, Germany

Jonathon Giffin, Georgia Tech, USA

Thorsten Holz, University of Mannheim, Germany

Farnam Jahanian, University of Michigan and Arbor Networks, USA

Richard A. Kemmerer, University of California, Santa Barbara, USA

Kwok-Yan Lam, Tsinghua University, China

Wenke Lee, Georgia Tech, USA

Richard Lippmann, MIT Lincoln Laboratory, USA

Raffael Marty, ArcSight Inc., USA

Roy Maxion, Carnegie Mellon University, USA

Ludovic Me, Supelec, France

George Mohay, Queensland University of Technology, Australia

Aloysius Mok, University of Texas, Austin, USA

Benjamin Morin, Supelec, France

Rei Safavi-Naini, University of Wollongong, Australia

Vern Paxson, LBNL/ICSI, USA

Robin Sommer, LBNL/ICSI, USA

Dawn Song, Carnegie Mellon University, USA

Salvatore Stolfo, Columbia University, USA

Toshihiro Tabata, Okayama University, Japan

Vijay Varadharajan, Macquarie University, Australia

Giovanni Vigna, University of California, Santa Barbara, USA

Jianying Zhou, Institute for Infocomm Research, Singapore

Corporate Sponsors

We solicit interested organizations to serve as sponsors for RAID 2007, particularly in sponsorship of student travel and other expenses for RAID. Please contact the Sponsorship Chair for information regarding corporate sponsorship of RAID 2007.
